**Introduction**

This AUTOMATIC PAPER MASKING MACHINE is mainly used in packing coil with protective tape (cooling paper) before metal spraying in order to avoid making short or getting damage. Besides, it is thereafter easy to unwrap the protected tape after metal spraying without damaging coil. Hence, using this AUTOMATIC PAPER MASKING MACHINE is the best way to save your time and manpower economically.

**Feature**

- Automatic operation by the machine itself from transportation of materials and package to winding operation.
- Fast packing: 30,000pcs/per day (Based one shift/8 hours a day).
- Economic manpower: One operator capable to run 5~8 sets of machine.
- Easy operation and fast adjustment.

**Specification**

- Production Capacity: 3600~4400pcs/per hour (According to the size of element)
- Packing Method: Press cooling paper
- Power Source: AC 220V, 60Hz, 1φ2W, 2KVA
- Machine Dimension (L x D x H): 850×850×1650mm
- Machine Weight: About 250 KGS
